

Royalat was founded with the sole purpose of making a Green Mattress made from non-toxic, natural and organic materials to provide a healthy and sound sleep.

Today, we stand proud as we announce that we have not only fulfilled our goal of designing the best organic latex products. but also the most comfortable and eco-friendly one.

Royalat's 100% Natural Latex mattresses and pillows, wrapped in breathable & plush organic covers are the ultimate door to your sleeping heaven!

◆ Healthy Sleeping Solutions For A Good Night's Sleep ◆

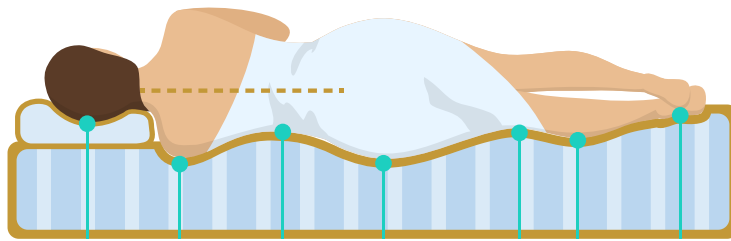

Royalat takes you to new heights of comfort and sleep.

Royalat's Natural Latex, with its unique elastic properties, instantly responds to your body by gently filling the gaps between the mattress and you. The result is a feeling you will love every single night and even more in the morning

◆ Royalat - The elite choice in mattresses ◆

Sleep under the quilt of health on Royalat's all Natural Latex mattress. Wallow in the benefits of healthy sleep, now and for the years to come.

Zero motion transfer

Royalat Latex mattress ensure quality deep sleep as your sleep cycle will not be interrupted by your partner's movement.

Hypoallergenic

There is no room for bed bugs and other irritating bacteria on a latex mattress. Latex is antimicrobial, and therefore, is naturally mold and dust mite resistant.

Anti-microbial

Naturally produced organic latex is inherently resistant to mildew, mold and bacteria.

Dust mite resistant

Latex, which is a product of the rubber tree, is naturally resistant to dust mites as it isn't a hospitable environment for it to thrive in.

What is Natural Latex?

Natural latex is the white, milky substance, or sap, found in the rubber tree. Trees are not cut down to harvest this liquid; instead, they are tapped. One rubber tree produces around 19 pounds of latex a year, and each tree can continue to make latex for up to 25 years. The process of harvesting natural latex is incredibly sustainable and eco-friendly.

What is a Latex Mattress?

A latex mattress is a mattress completely made from natural Latex. A latex bed can be one of the best mattresses on the market if you're looking for a durable and eco-friendly mattress.

Latex also makes for an excellent cooling mattress, especially because the material doesn't wholly contour to your body. The space between you and your mattress lets air flow through to wick away body heat.

◆ Benefits of Natural Latex Mattress ◆

Toxin Free

Latex is a 100% natural component obtained from the sap of rubber trees, hence, it is free of toxins. Natural latex does not emit carcinogenic substances.

Hypoallergenic

There is no room for bed bugs and other irritating bacteria on a latex mattress. Latex is antimicrobial, and therefore, is naturally mold and dust mite resistant.

Highly Breathable

Latex foam has an open-cell structure that regulates airflow like no other mattress foam. It keeps the surface temperature cool even during hot and humid conditions.

Natural Orthopedic Benefit

Organic mattresses like natural mattresses have an amazing ergonomic design that contours heavy body parts and relieves pressure as soon as you lie on them.

Natural Bounciness

Latex mattress has high responsiveness because of its natural bounciness. It retains shape faster than a memory foam mattress and never sags.

Durable

The durability of a natural latex mattress is unmatched, as it can last for as long as 20 years or even more. Other mattresses can live only up to 8 years.

Zero Partner Disturbance

Modern latex mattresses are equipped with the feature of no motion transfer. It locks motion and doesn't allow it to transfer to the other side of the bed.

Eco-Friendly and Sustainable

It is totally eco-friendly and benefits the environment in many ways with its goodness. Latex is tapped from the sap of rubber tree, hence, it is purely organic and sustainable.

Safe for Children

Latex mattress completely supports to deliver a dreamy slumber compatible with children. The firmness provided is right for your child and delivers a dreamy slumber.

◆ Sleep Like Never Before! ◆

Do you wake up tired with stiff joints and a sore back even after completing 8 hours of sleep?

Do you feel unenergetic, no matter how many hours you sleep?

If you identify yourself with the above conditions, we suggest that the cause of your unrest could be your mattress!

With Royalat's Natural Latex mattress, put your sleep worries to rest and wake up to a beautiful, well-rested you.

High quality of sleep

Sound sleep automatically translates to a reduced risk of cardiovascular diseases and a sharper mind. Royalat gives you the healthiest and soundest sleep for the next 10 years, if not more.

Boosts blood circulation

Royalat's Latex mattress provides even pressure distribution over your body which enhances blood circulation to give you a sound sleep.

Relieves back pain

Royalat's latex mattress, with its unique ability to push back, conforms to your body's natural curves and will relieve any body pain you're suffering from.

Antiperspirant

Natural Latex is inherently breathable due to its open cell structure. The antiperspirant properties allow ventilation of body heat and let you enjoy the best quality sleep.

Health along with nature

Royalat mattresses are made up of all Natural Latex. It is devoid of pollutants, toxins, and chemical odours generally found in synthetic bedding. In addition to being hypoallergenic, pain-relieving, and naturally breathable, they also help you reduce your carbon footprint contributing towards a sustainable earth.

◆ Difference Between Chemical Mattress And Natural Mattress ◆

You can find an abundance of Memory foam, Spring Cotton and HR foam mattresses in the market. The reason is a no brainer! It is made of fast chemicals which is immediately processed and the finished product is sold in the market at the soonest It has nothing to do with the welfare of the environment, as well as your physical health It only sells luxury and comfort at the expense of nature's wellbeing. Let's learn the basic difference between a chemical mattress and a natural mattress

CHEMICAL MATTRESS	NATURAL MATTRESS
Includes formaldehyde, benzene, and chemical flame retardants	Included natural components delivered from trees and plants
Tends to off-gas which is highly toxic	Non-toxic, no off-gassing
Traps heat and makes you sleep hot	Doesn't trap heat, makes you sleep cool and dry
Compact cell structure does not allow air circulation, no breathability	Open cell structure allows constant airflow, highly breathable

Royalat Brings The Essence of Nature to Your Bedroom

100% Natural Latex

Royalat products are made from 100% Natural Latex. They are not made from synthetic or blended latex, which makes them devoid of any toxins and pollutants.

Organic fabric covering

Royalat provides you with three options of fabric coverings to choose from;

Organic Tencel Fabric

Tencel is a botanic fiber found in nature. It is harvested from Eucalyptus trees and produced through a closed loop manufacturing process.

Organic Cotton Fabric

Organic cotton fabric is grown without the use of any pesticides. It feels softer, smells cleaner and is less likely to trigger any allergies.

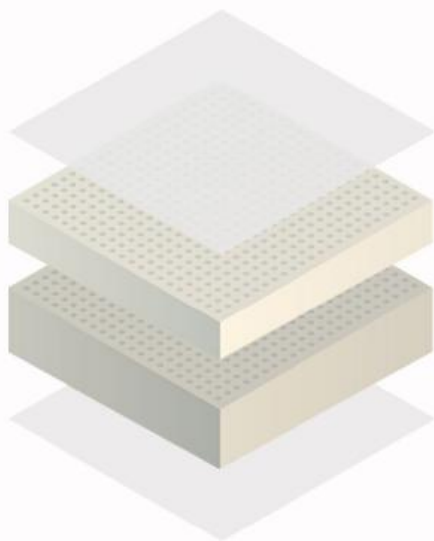

Organic Bamboo Fabric

Organic bamboo fabric is made from the pulp of bamboo grass without the use of any pesticides. It is hypoallergenic, moisture absorbing and quick drying.

◆ Royalat Premium Mattress ◆

Experience the wonders of Pincore Technology

Why Dunlop Latex?

Here's why we use Dunlop latex for Royalat products.

More density

Dunlop latex is denser than Talalay latex due to higher foam to air ratio. As a result, Dunlop provides you a firmer bedding.

More eco-friendly

In comparison to Talalay latex, Dunlop latex needs less processing due to which they are more eco-friendly than the former.

More affordability

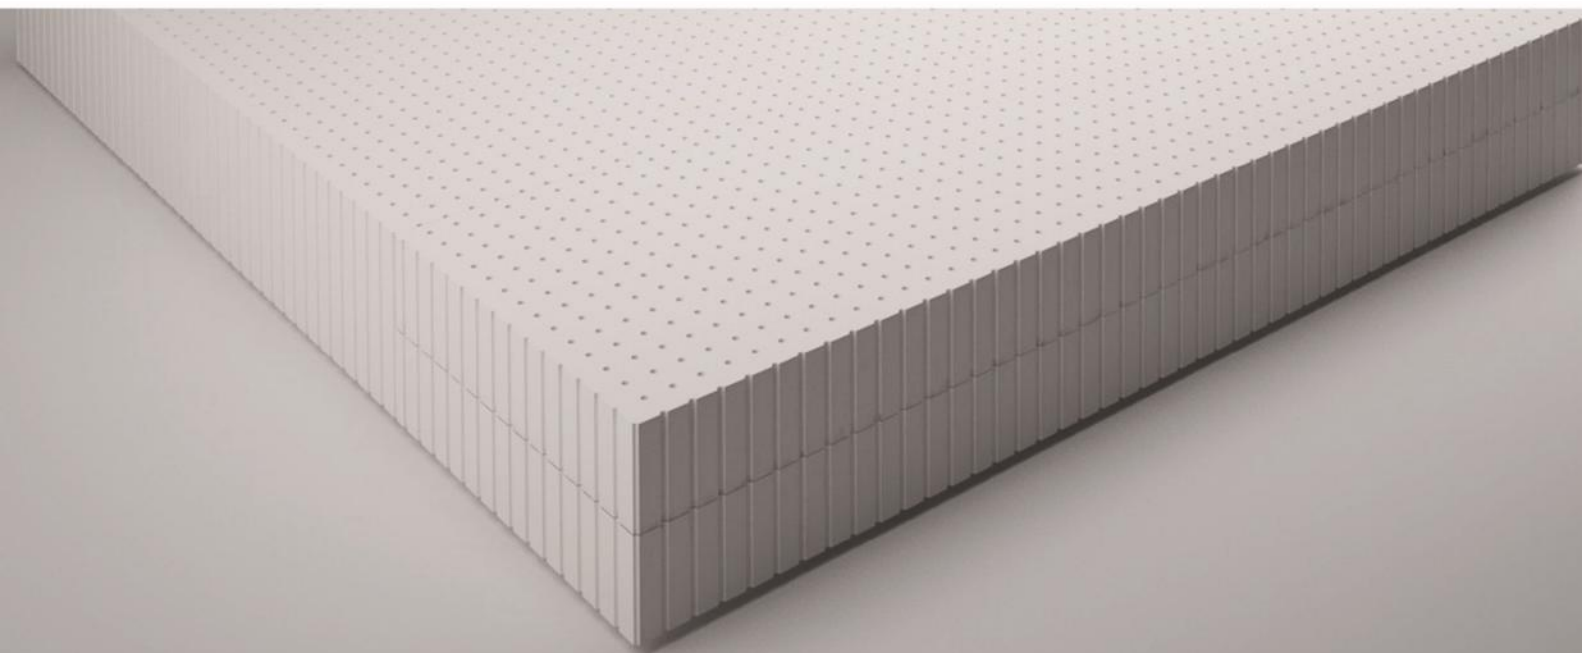

Estimates show that Talalay latex takes 4 times longer and 5 times as much energy for manufacturing than Dunlop latex, making Dunlop latex much more affordable.

More durability

The durability of Dunlop latex is higher compared to Talalay latex as the latter has lesser density due to large amount of aeration.

More springy

Dunlop latex is more springy and less bouncy and doesn't give you a sinking sensation that Talalay mattresses usually do.

Live life cleaner by making earth greener

The manufacturing and distribution of Royalat premium quality products help the planet turn a shade greener.

Sustainable Resource

Natural Latex is tapped from rubber trees without cutting them down, allowing the trees to live, grow and purify the environment, it is ensured that new trees are planted in order to replace the older ones at the end of their life span.

Biodegradable & Recyclable

Latex is recyclable when it is utilized to its fullest extent, it can be discarded in a landfill where it will degrade eventually.

Less Carbon Footprint

Latex products have less carbon footprint as the carbon dioxide emissions during the life cycle of Natural Latex products is very less.

Royalat Pillows

Comfort that brings happiness to life

Royalat latex pillows are made from 100% Natural Latex that comes from the sap of rubber trees (*Hevea Brasiliensis*). It is naturally resistant to dust mites, and bacteria without the addition of any harmful chemicals.

Royalat latex pillows are manufactured using cutting edge Pincore Technology that allows air circulation and breathability resulting in a comfortable sleeping temperature.

Royalat pillows are extremely well-equipped and come with the best quality organic fabric. The perfect resilient surface of our latex pillows offers a soft feel that allows your head to sink into a while being strong enough to support the weight of your head. Whether you sleep on your back or your side, our latex pillows will provide great support for a good night's sleep.
